

Annmariya Wilson

Full Stack Developer (Next.js | MERN / MEAN | SaaS Platforms)

Kasargod, Kerala | annmariyawilson31@gmail.com | +91 8301921926 | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 1+ year of experience building scalable SaaS platforms and trading dashboards using Next.js, React.js, Angular, Node.js, and MongoDB. Skilled in multi-role systems, real-time analytics, REST APIs, and responsive UI development. Delivered production-ready applications, implemented WhatsApp automation (WATI/chatbots), and optimized performance and SEO. Experienced in AI-assisted development, Agile workflows, and building high-performance, user-centric solutions.

TECHNICAL SKILLS

Frontend – React.js, Next.js, Angular, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap

Backend – Node.js, Express.js, REST APIs, Authentication (JWT, RBAC)

Database – MongoDB, MySQL, Supabase

AI & Automation – WATI, WhatsApp Bot Integration, Antigravity, Cursor, Firebase Studio, ChatGPT

Tools – Git, GitHub, Bitbucket, Jira, Postman, Slack

Deployment – Vercel, Render, Netlify

Concepts – SaaS Architecture, API Integration, Responsive Design, Agile/Scrum, SEO Optimization

PROFESSIONAL EXPERIENCE

Full Stack Developer

08/2025 – present

Think Forge Global LLP

Project: Zvest Capital – Trading Platform

- Developed enterprise-grade SaaS trading platform supporting Admin, Employee, and User roles.
- Built scalable dashboards with real-time financial analytics and performance tracking.
- Integrated REST APIs for trading data, portfolio management, and dynamic updates.
- Designed responsive, pixel-perfect UI using Next.js, Tailwind CSS, and modern UI libraries.
- Improved application performance, SEO, and loading speed through optimization techniques.
- Collaborated in Agile teams using Jira, Bitbucket, and Git workflows.
- Accelerated development using AI tools, improving productivity and delivery timelines.

Web Developer Intern

03/2025 – 08/2025

Nexpression Pvt Ltd

Project: Foodyko – E-commerce Platform

- Developed a scalable full-stack e-commerce application using the MEAN stack.
- Implemented secure authentication and authorization using JWT and role-based access control (RBAC).
- Designed and built reusable Angular components to ensure modular and maintainable code.
- Integrated RESTful APIs for real-time product management, cart updates, and order processing.
- Optimized application performance, reducing load time and improving overall user experience.
- Built fully responsive UI ensuring seamless functionality across mobile, tablet, and desktop devices.

Full Stack Developer

02/2025 – 03/2025

Freelance

Project: College Management System

- Developed a full-stack College Management System with separate Admin and User interfaces.
- Built secure authentication and role-based access for controlled system usage.
- Implemented CRUD operations for managing students, faculty, courses, and records.
- Designed responsive dashboards ensuring seamless experience across all devices.
- Integrated REST APIs for efficient data handling and real-time updates.

PROJECTS

Trading Platform – Zyvest Capital

Tech: Next.js, React, Tailwind CSS, shadcn/ui, REST APIs

- Developed multi-role dashboards (Admin, Employee, User) with real-time trading analytics
- Designed responsive, pixel-perfect UI using shadcn/ui components
- Integrated REST APIs for portfolio tracking, trading metrics, and reporting
- Built scalable and optimized frontend for seamless cross-device performance

Business Website - Kalangara Paint House

Tech: React, Node.js, Supabase

- Developed responsive business website with service showcase and enquiry system
- Integrated WhatsApp API for real-time customer communication and lead generation
- Implemented image upload, PDF conversion, and automated messaging workflows
- Built scalable and user-friendly UI optimized for mobile-first performance

Corporate Service Website – Chill Master UAE

Tech: React, Tailwind CSS

- Developed corporate HVAC website with modern and responsive UI/UX
- Implemented enquiry and quotation request system for lead generation
- Optimized performance with mobile-first and fast-loading design
- Built clean, scalable frontend ensuring smooth user experience

College Management System – Holy Cross College

Tech: Angular, Node.js, Express.js, MongoDB

- Developed full-stack system for managing students, faculty, and courses
- Implemented secure authentication with role-based access control (RBAC)
- Built complete CRUD operations for efficient data management
- Designed responsive admin dashboard for seamless cross-device usage

EDUCATION

Bachelor of Computer Applications (BCA)

2021 – 2024

Kannur University

CGPA: 7.5

COURSES

MEARN Stack Development

05/2024 – 12/2024

Luminar Technolab

Completed an intensive MEARN Stack Development program covering MongoDB, Express.js, Angular, React.js, and Node.js. Gained hands-on experience in building full-stack web applications, developing RESTful APIs, implementing authentication (JWT), and creating responsive user interfaces using modern frontend frameworks and best practices.
